WORK EXPERIENCE

Data Analytics Intern

Grras IT Solutions, Ahmedabad

Feb 2026 – Mar 2026

- Worked on real-world data analytics projects using SQL, Exploratory Data Analysis (EDA), and Power BI
- Performed analysis on the AdventureWorks database by understanding relationships across 80+ interconnected tables and writing complex SQL queries to extract business insights
- Developed the World Indicators Dashboard to analyze global economic and social metrics using interactive visualizations
- Analyzed revenue, customer behavior, and key performance indicators to support data-driven decision-making

ACADEMIC PROJECTS

HIRE HORIZON, Job-Portal App [React]

[GitHub](#)

- Built a responsive MERN-based job portal with user authentication, job application workflows, and an admin dashboard to manage postings and users.
- Worked with structured user data, validation logic, and consistency checks across workflows.

World Indicators Analysis Dashboard [Power BI & Python]

[GitHub](#)

- Developed an interactive dashboard to analyze global economic and social indicators across multiple countries
- Implemented dynamic filters and slicers for comparative country-level analysis

CERTIFICATIONS
