

# Project 1

## Task: Cancer Dataset Familiarization Report

### Important Instruction

You are **not required to perform any data analysis**.

Your task is only to **understand the dataset**.

---

## Step 1 – Open the Dataset

Students may use:

- Microsoft Excel
- OR**
- Google Sheets

### Tasks:

1. Open the dataset file.
2. Count the total number of rows.
3. Count the total number of columns.

Write the following:

- **Total Records = \_\_\_\_\_**
- **Total Columns = \_\_\_\_\_**

## Step 2 – Column Understanding

Create a table explaining each column in simple words.

Use the format below:

| Column Name | Meaning (In Your Own Words)            |
|-------------|----------------------------------------|
| Age         | Patient age                            |
| Smoking     | Whether the patient smokes<br>(Yes/No) |
| Stage       | Cancer stage level                     |

⚠ Use simple language. No technical terms required.

---

## Step 3 – Column Categorization

Group the columns into the following categories:

### 1. Demographic

(Example: Age, Gender, Country)

Write all demographic-related columns here:

---

### 2. Lifestyle

(Example: Smoking, Alcohol, Obesity)

Write all lifestyle-related columns here:

---

### 3. Medical

(Example: Cancer Type, Stage)

Write all medical-related columns here:

---

#### 4. Cost

(Example: Treatment Cost)

Write cost-related columns here:

---

#### 5. Outcome

(Example: Survival Years, Severity)

Write outcome-related columns here:

---

## Step 4 – Basic Observations

Use Excel filters or sorting to answer the following questions.  
(No formulas required.)

1. Which country appears the most?
2. Which cancer stage is most common?
3. What is the minimum and maximum treatment cost?
4. What is the minimum and maximum survival years?
5. Which gender count is higher?

Write your answers clearly below:

1. 

---
2. 

---
3. 

---
4. 

---
5. 

---

# Step 5 – Business Thinking

Answer the following questions in simple English:

1. Which factor may affect cancer severity?
2. Why is early stage detection important?
3. Why is treatment cost analysis useful?
4. What type of analysis can hospital management perform?
5. Write any two questions you would like to analyze later using this dataset.

Answers:

1. \_\_\_\_\_
  2. \_\_\_\_\_
  3. \_\_\_\_\_
  4. \_\_\_\_\_
  5. \_\_\_\_\_
- 

## Final Submission Instructions

Submit your report in:

- Word Document (.doc / .docx)  
**OR**
- PDF Format

Your report must include:

1. Dataset Summary
2. Column Meaning Table
3. Column Categories
4. Basic Observations (5 Answers)
5. Business Thinking Answers
